WORK EXPERIENCE

Senior Data Systems Analyst

MTA Bridges & Tunnels (New York, NY)

May 2024 - Present

- Oversee the development of data systems and reporting infrastructure supporting the Central Business District Tolling Program (congestion pricing), ensuring accurate and timely information for leadership decision-making and public reporting.
- Coordinate analytical work across internal teams and external agency partners to deliver research and evaluation products that meet statutory reporting requirements.
- Translate complex operational and policy data into executive memos, briefings, presentations, and public-facing materials for senior leadership and external stakeholders.
- Develop public dashboards and open datasets that increase transparency and accessibility of congestion pricing data for policymakers, researchers, and the public.
- Played a key role in producing the program's first public evaluation report, ensuring analytical rigor and coordinating data inputs for a high-profile release under significant public and political scrutiny.

Data Solutions Analyst

Community Solutions (New York, NY)

January 2022 - May 2024

- Partnered with leaders of local homeless response systems to scope analytical projects and deliver tailored data tools that supported strategic decision-making and program improvement.
- Managed a portfolio of web applications and data products used by internal teams and community partners, overseeing development, maintenance, and documentation to ensure reliability and usability.
- Developed key performance indicators (KPIs) and reporting frameworks to evaluate program effectiveness and help leadership track progress toward strategic and mission-driven outcomes.

Analyst

What Works Cities (New York, NY)

November 2019 - January 2022

- Led cities through the What Works Cities Certification process, facilitating calls with mayors and other leaders of prominent US cities to evaluate their use of data and evidence in decision making
- Coordinated the development and launch of the *City Budgeting for Equity and Recovery* program, providing critical support to mayors and city financial leaders in the wake of COVID-19
- Performed statistical analysis, data cleaning, and database management for the organization to provide crucial insights and data-driven recommendations for programmatic decision-making within the organization

Manager of Research

Greater Ohio Policy Center (Columbus, OH)

June 2018- August 2019

- Scoped, managed, and conducted high-quality research projects focused on issues and best practices related to urban revitalization and smart growth that led to concrete policy changes
- Provided technical assistance to leaders in Ohio cities on topics such as blight removal, affordable housing, downtown revitalization, and capacity building
- Estimated the \$180 million economic impact of landbanking in Central Ohio through rigorous geospatial analysis of administrative datasets
- Served as an evaluator of a \$3 million grant, tracking changes in neighborhood conditions through demographic/economic data as well as on-the-ground interviews

Research Associate

Greater Ohio Policy Center (Columbus, OH)

May 2017- June 2018

EDUCATION

Master of Science in Applied Urban Informatics

New York University, New York, NY
3.8 GPA - Graduated August 2020

Bachelor of Arts in Economics
